Bill, we have received a request to extend the Mount Powell Salvage Timber Sale contract term to 12/31/15. This request is being made by the Purchaser, Gary Land Company, to complete the logging of approximately 20 acres and the remaining slash work on approximately 50 acres of the timber sale area. They need to extend the contract term into next winter to allow for log hauling across a small stream/wet area which can only be accomplished when the area is frozen. We hoped to have this area completed early this year but the warmer temperatures have not been helpful. Do you have any concerns at this time with extending this contract? I spoke to Cary Green about this request and I understand he is meeting with you this morning. Cary can fill you in with the background of the timber sale and answer any questions you may have. Please let me know if you have any questions. Thanks
