The USFS will be conducting pile burning operations in the Barton Gulch and Tiger rd. areas, North of Breckenridge CO. The Barton Gulch piles are located in the clear-cuts North of Barton RD, west of Highway 9, and Coyne Valley Rd. Additionally there will be a concurrent operation in The Tiger RD, and Revett Rd. area. The pile burn will take place starting 1/28/2015 and smoke could be visible for more than one day. The weather and ventilation is expected to be favorable for the burn and ignition operations will begin around 1000. Smoke will be visible from The Highlands Subdivision, Breckenridge, Breckenridge Ski Area, Hwy 9, Tiger Rd, and Wilderrest Subdivision. With the recent winter snowfall fire danger is low, please do not call 911.

The purpose is to help reduce fuel loading that occurred during hazard tree and wildfire hazard fuels reduction. For more information about this winter's burn program watch the following Public Service Announcement from the US Forest Service and Lake Dillon Fire.
